SECO-LARM MVD-V1201-1Q Active VGA Extender (Transmitter/Receiver) over Cat5e/6 with Audio

Active VGA Extender (Transmitter/Receiver) over Cat5e/6 with Audio

Features

- Transmits VGA signals from personal computers, DVRs, video splitters, to CRT or LCD monitors or VGA projectors
- Local output allows for playback at a local station as well as remote stations
- Extends the range of VGA and stereo signals up to 984ft (300m) over one Cat5e/6 cable
- Gain and peak adjustments to account for different UTP cable lengths. Use gain for brightness adjustment and peak for skew adjustment
- Supports up to 1920x1200 resolution
- Each pair includes one transmitter and one receiver and is plug-and-play ready
- Works with monitors, projectors, HDTVs, and flat panel screens
