

Gefen GTV-CR-3SP GefenTV Conference Room Speakers (3) Pre-Order

Enjoy high-quality sound designed for your bedroom or conference roomThe GefenTV CR-3SP speaker system consists of three exquisitely designed and tuned stereo speakers which perfectly compliment the small confines of a bedroom or conference room. The GTV-CR-3SP speakers have been designed for high-quality audio fidelity rather than booming bass and high volume output. These speakers feature handsome exterior construction and will fit stylishly in a variety of decors. They come ready for wall mounting.

The GTV-CR-3SP speakers are perfectly suited to work with any audio amplifier, especially the GefenTV Audio Processor, for which they were designed. **How It Works**Simply connect the GTV-CR-3SP speakers to your amplifier. The GTV-CR-3SP speakers are equipped with 5-way binding posts having connectors as follows: bare wire, spade lug connectors, pin connectors, and two types of banana plugs (single and dual).

Once all of your AV system connections are established, set the amplifier's volume to a low level, turn on all connected AV equipment, and then increase the output volume to a comfortable level.

Features:

- Superior pristine audio from a carefully designed set of compact speakers
- Designed to fill small rooms with high-quality sound
- Speaker Baffle naturally tilts upward on flat surfaces
