

# Gefen RMT-4IR IR Remote for use with 4x2 and 4x1 DVI and HDTV Switchers

## IR Remote for use with 4x2 and 4x1 DVI and HDTV Switchers

The Gefen EXT-RMT-4IR IR Remote Control allows effortless selection of sources to be displayed on the connected display when using a 4-input Switcher. The remote may be operated up to 30 feet away from the Switcher.

### How It Works

Simply point the EXT-RMT-4IR at your Gefen Switcher unit from up to 30 feet away. Press the button corresponding to the desired source and the Gefen unit will display that source on your display. An LED indicator light confirms each keypress to show that IR commands are being sent to the Gefen unit.

**Note:** The EXT-RMT-4IR IR Remote Control and the Gefen unit to be controlled must be in a direct line of sight without objects between them in order to function properly and achieve the 30-foot maximum distance range of operation.

### Features:

- Compact, small and light unit fits in a pocket
- Controls your Gefen unit from up to 30 feet away (when used in line-of-sight orientation)

### Specifications:

- Dimensions: 2.7"W x 4.5"H x 0.7"D
