

Datavideo SE-3200 HD 12-Channel Digital Video Switcher

The SE-3200 is a professional 12-channel, 1080p video switcher that provides powerful and easy-to-use video effects such as four upstream keyers for Chromakey and Luma Key, dual DSK, PIP, and WIPE transitions. There are also other features like frame store, animated transition effects, multi-channel inputs, and abundant visual effects. The built-in subtitle generation system can be paired with Datavideo's CG software to instantly create broadcast quality subtitles.

The SE-3200's modular design allows you to install the 2U main unit on a standard 19-inch rack and place the control panel on a flat work bench, or it can be installed in an outdoor broadcast van. The SE-3200 facilitates video switching, whether indoor or outdoor.

Features:

- Supports full 1080P (3G)
- 4 Upstream Keys for chromakey, linear and luma keys as well as picture-in-picture
- 2 Downstream Keys for generating different effects
- 4 Broadcast Quality keyers with 50 built-in virtual sets
- 9 built-in Stinger transition effects
