

Comnet PS-DRA100-48A Industrial DIN Rail Mounting 100 Watt 48 Volt Power Supply

The ComNet PS-DRA Series offer a complete range of high quality, low noise switching mode power supplies of various output sizes ideally suited to the entire ComNet industrial product range that require 48VDC power input. These rugged units are DIN rail mountable, providing an ideal mounting configuration to a mating ComNet industrial switch or any product using our range of DIN rail mounting adapters. The wide ambient operating temperature range permits installation in most out of plant and unconditioned environments, such as those found in intelligent transportation systems or factory automation/industrial control applications. Unconditional line and load protection is provided.

Features

- Auto Select 115/230 VAC Input Voltage
- Designed for standard 7.5 or 15 mm DIN rail mount installations
- Adjustable output voltage range support
- High operating efficiency; up to 88%
- Compact form-factor saves space in those installations where space may be at a premium.
- No fans or forced-air cooling; cooling via natural convection eliminates unreliable and troublesome fans/moving parts, with no periodic maintenance requirements.
- Wide operating temperature range
- 3 Year Warranty

Applications

- Power Supplies for ComNet Industrial Products
