

Electro-Voice RE972TXBEIGE Condenser Omnidirectional 2-Sided MiniMic Low Profile Headworn Microphone (TA4F/Light Beige)

The RE97-2Tx is an Ultra-low profile, omnidirectional, back-electret condenser headworn microphone ideal for applications where a full - range, natural, well balanced sound is required. The RE97 microphone element provides a clean and accurate sonic quality and uniform output. This has a two ear hook design with a band behind the head for comfort and stability. The band is fully adjustable and the hooks fold flat for storage and the boom can be on the left or right side.

Features:

- Two ear wearing style for stability
- Lightweight, durable
- Interchangeable for left or right side microphone boom
- Omni-directional polar pattern for clean sound
- Moisture resistant
- TA4F connector is compatible with all EV bodypack transmitters
- Use with TXA for wired XLR applications
- Color: Beige
