

Electro-Voice PCDESKTOP5 5 inch Dual Condensator Multi-Pattern Gooseneck Desk Microphone with Automatic Mixer Logic

This listing is for PCDESKTOP5 Microphone only. Use description below as a general reference.

The PolarChoice Desktop is a high quality tabletop microphone that can be used with both standard and automatic mixers, and is highly-shielded from RFI/GSM thanks to EV's exclusive RF Shield technology.

The PC Desktop features the exclusive EV PolarChoice miniature multi-pattern gooseneck microphone. The multi-pattern versatility of the PolarChoice microphone makes it a true "problem solver". With one non-directional and 3 directional polar patterns available, the PolarChoice microphone is ideal for virtually any installation. The PC Desktop also includes a switchable high pass filter that helps reduce any vibration induced noise pickup.

The PC Desktop features a large push button mute switch that has a much better "feel" than membrane switches. The mute button can be configured for push-on/push-off, push-to-talk, or push-to-mute function. Switch programming is easily accomplished without disassembling the microphone. A switch on the bottom quickly converts the PC Desktop to automatic mixer mode. In this mode, audio is always on.

Applications:

The PolarChoice Desktop is acoustically designed for high-quality sound reinforcement and broadcast applications. The frequency response is tailored for wide-range sound reproduction with very natural sound pickup for either distant or close-up use. The PC Desktop can be used on lecterns, podiums, desks, table-tops, or other applications. To maximize gain-before-feedback, the PolarChoice's three directional polar patterns allow the user to pick the directional polar pattern for optimum effect. For those applications where gain-before feedback is not a problem, an omnidirectional pattern is included. Applications requiring speaking close to the microphone at podiums, lecterns, or pulpits normally require a windscreen (included) to control breath noise and P-popping or, in some cases, wind noise from circulating air.

Features

- RF Shield provides superior RFI/GSM shielding.
- Multi-pattern versatility. Choose between omni, cardioid, supercardioid or hypercardioid to easily adapt to any situation.
- Consistent microphone voicing across all four patterns.
- Switch can be programmed to operate as either latching on/off or momentary push-to-mute/push-to-talk.
- Disassembly of the mic isn't required to change switch functions.
- Compatible with echo cancellation for conference applications.
- High visibility blue LED clearly displays mic status to the user.
- Exceptional sound quality with EV's proven PolarChoice design.
- Available in three gooseneck lengths: 18", 12" or 5".
