Atlona KIT-PROHD2 Atlona Custom Installation Testing Kit (Includes HDMI Signal Generator, 7-inch HDMI/VGA/Component Monitor and Pelican case

Atlona Custom Installation Testing Kit (Includes HDMI Signal Generator, 7-inch HDMI/VGA/Component Monitor and Pelican case). Model: KIT-PROHD2

The Atlona KIT-PROHD2 is designed to diagnose digital connectivity issues in AV systems. This tool suite allows residential and commercial integrators and installer the ability to diagnose 99% of all digital connectivity issues in moments, saving both time and overhead.

The AT-HD800 signal generator allows users to send a variety of high resolution testing patters in both 2D and multiple 3D formats. This unit also provides and on screen readout of all EDID information sent from the Display Data Channel (DDC) allowing users to pinpoint interoperability issues in sources, cables, extenders, switchers, AVR's, distribution Amplifiers and Displays.

The Atlona AT-DIS7-PROHD is a 7" HDMI/VGA/Component testing monitor designed to test display capabilities of any Digital AV system. This portable display will recognize any HDMI, DVI, VGA or Component Video sources at both HDTV and VESA resolutions up to 1080p or 1920x1200, and allow integrators and installers to observe both digital audio and video signals in real time.

The AT-HD800 and AT-DIS7-PROHD come in a High Quality Pelican case
