

Atlona AT-AiR3 PC to HDTV, Projector or Monitor Wireless adapter (Now With 1080p!!!)

Atlona PC to HDTV, Project or Monitor Wireless adapter (Now With 1080p!!!). Model: AT-AiR3

The Atlona's all new AT-AiR3 is designed to connect any Windows or Mac Based computer to your HDTV, Projector or Computer Monitor wirelessly through HDMI or VGA Connections. The AiR3 is based on a powerful Ultra Wide Band technology, allowing users to extend high resolution content up to 30ft away from any computer's USB port. Atlona wireless PC to TV transmitter is capable of supporting resolutions up to 1080p. The AT-AiR3 features dual video (HDMI and VGA) and dual Audio (HDMI-Audio and 1/8" mini stereo) outputs which are active simultaneously.

The versatile AiR3 serves both in commercial and home applications, giving users an easy way to connect projectors in meeting rooms or HDTV's in living rooms to any computer or laptop. The Atlona AiR3 gives users the flexibility of being able to conveniently extend their computer's visual workspace to a larger screen. The AiR3 features the two most common interfaces for both TV and computer displays, HDMI and VGA interface. **Both HDMI and VGA output connections are active at the same time**, allowing the AiR3 receiver supply content to both a digital and an analog display, such as an HDTV and a projector in a conference room.

Applications:

1. **Education:** Many K-12 and higher education schools and Universities utilize the Atlona AiR3 wireless PC to Projector solution for their class rooms. The lack of cables allows instructors the mobility needed to move around the class room, while maintaining connection to their display. The "USB stick" can be transferred from computer to computer like a USB flash drive, accommodating learning environments where multiple instructors use the same classroom. The AiR3 also serves as a way to take traditionally single user education software, such as language learning programs like Rosetta Stone, to a more communal learning setup where multiple users can learn at the same time.

2. **Conference Room:** The Atlona AT-AiR3 is the perfect device to allow a simple PC to TV conference room environment. Each presenter can connect the small USB dongle to their laptop to and see their presentation in seconds on a shared screen for everyone to see. Using Microsoft's Power Point or Apples Keynote extended monitor mode, presenters can control and modify their presentation, while displaying slides to their audience.

3. **Home use:** So much digital content is available online such as video, books, music and more, home users are doing more and more with their computers. The AT-AiR3 allows user an ability to move the small laptop screen to a Large HDTV or a Projector to enjoy Netflix, Youtube, Showing their Picassa Photos or viewing any other content on the big screen. The AiR3 is a no-wire solution to enlarge your computer screen to the size of your HDTV and move it to a living room.

Key Features:

- Compatible with any HDTV, Projector or a Computer Monitor.
- High Resolutions up to 1080p
- Extend PC or Mac display up to 30ft (10m) away with high resolutions up to 1080p
