

Hall Research 1800-RA 1800-RA 1x18 VGA Distribution Amplifier

Enhance presentations and displays with Hall Research's high resolution Video Splitters Distribution Amplifiers. These devices allow your video signal to be displayed simultaneously on 2, 4, 8, or 18 monitors all as sharp and clear as the original. The 1800-RA provides long cable compensation switches for each group of 4 outputs to drive cables to 300 feet.

Features

- Rack mount heavy-duty construction
- Built-in power supply
- Includes a high-quality input cable
- 350 MHz Bandwidth for a crisp picture at any resolution or refresh rate
- Can drive video cables to 150 feet (or greater depending on refresh rate) on all outputs
- Compensation switches for outputs 1 to 16 for pre-emphasizing signal to 300 feet
- Designed and manufactured in the USA

Specifications

- Video Specs:
 - Connectors Input and Outputs: HD15 female
 - Coupling: DC
 - Signal Level Video: 0.7 v p-p
 - Bandwidth: Range: DC to 250 MHz Min - 350 MHz Max.
 - Input impedance: Video: 75 ohms on RGB, 330 ohms on H,V
- Dimensions: 15.5 " wide x 3.19" high x 10" deep
- Power Requirement: 100 to 240 v AC, 50-60 Hz, 25 Watts
- Weight: 12.3 lbs
