

# Shinybow SB-3730-300 1:4 SHINYBOW COMPONENT VIDEO / ANALOG AUDIO AMPLIFIER SPLITTER

## 1x4 Component Video/Analog(Stereo) Audio Distribution Amplifier. Model SB-3730-300

The 1x4 Component Video/Analog Audio Distribution Amplifier is designed to work as a splitter for component video/analog audio applications. Primarily made to split a Component Video and audio signal from one source to four devices with compatible inputs. A built in amplifier will boost the signal to the needed level, to prevent signal loss and picture degradation. A maximum bandwidth of 300MHz will support a sharp and highly defined video in multiple resolutions of up to 1080p. The 1x4 Distribution Amplifier works with satellite and cable set-top boxes, DVD players, D-VHS players and all other equipment that is equipped with Component Video and Analog Audio Connections.

### Features:

- Sends Audio and Video to multiple displays at the same time
- Allows connection of 4 displays
- Supports 480i, 480p, 720p, 1080i and 1080p video resolutions
- Installs in seconds

### Specifications:

- Video Amplifier Bandwidth: 300MHz
- Resolution: up to 1080p
- Audio/Video Input Connectors: 5-RCA 75&8486;(Y/Pb/Pr & Al/Ar)
- Audio/Video Output Connectors: 4 sets of 5-RCA 75&8486;(Y/Pb/Pr & Al/Ar)
- Output Distance: up to 50m
- Power Consumption: 350mA (max.)
- Power Supply: 12VDC; 500mA
- Amplifier Size: (L/W/H) 12in / 5.90in / 1.73in

### Package Includes:

- 1x4 Distribution Amplifier
- Instruction Manual
- 1 6ft 5-Way RCA-to-RCA (Y/Pb/Pr/Al/Ar)
- AC/DC Adapter: 12VDC, 500mA

Warranty: 1 year labor/parts manufacturers warranty.
