

Atlona AT-COMP10SS 1 X 10 Component Video With Stereo Analog And/Or Digital Audio Distribution Amplifier Over Cat5/6/7

**ATLONA 1 X 10 COMPONENT VIDEO WITH STEREO ANALOG AND/OR DIGITAL AUDIO DISTRIBUTION AMPLIFIER OVER CAT5/6/7
MODEL: AT-COMP10SS**

The Atlona AT-COMP10SS is a 1 x 10 component video with stereo analog and/or digital audio distribution amplifier. It is designed to accept a video and audio feed from a component video source such as a DVD player, cable/satellite box, media player or digital signage player and distribute a source to up to 10 locations. Perfect for small business, restaurants or sports bar's. The AT-COMP10SS features 10 x CAT5/6/7 RJ45 outputs that extend the signal up to 1000ft with the Atlona AT-COMP300RL receiving modules.

The AT-COMP10SS also features a local component video and stereo analog and/or digital audio output. This feature provides a connection to a local display for monitoring or daisy chaining to another AT-COMP10SS distribution amplifier.

Note: Receiving model AT-COMP300RL is a required accessory.

Key Features:

- Extends a component video with stereo analog and/or digital audio signal up to 1000ft away to 10 locations.
- Supports full HD video with resolutions up to 1080p.
- Compatible with **AT-COMP300RL** cat5/6/7 receiving module.
- Local component/audio output for monitoring or to daisy chain to another AT-COMP10SS distribution amplifier.
- Extends an audio/video signal over cat5/6/7 up to 1000ft @ 1080p, 1250ft @ 1080i/720p, 1400ft @ 480p.
- Rack mountable (1U), includes rack mount brackets.
