

SECO-LARM E-100LB Entry Level RF Vehicle Alarm System

RF Remote Controlled Vehicle Security System from SECO-LARM.

Featuring 2nd channel output, pos./neg. flip-flop door lock outputs, shock sensor bypass from remote, selectable door-lock timing (0.5 or 3.5 second), programmable ignition-controlled door locking, and more.

Features

- 2nd Channel Output
- Pos./Neg. flip-flop door lock outputs
- Shock Sensor Bypass from remote
- Selectable door-lock timing (0.5 or 3.5 second)
- Programmable ignition-controlled door locking

(1) Miniature Brain (3x23/4x11/4)"

- Patented Q.Q.T. for quick and quiet test of alarm
- Patented Fail-Safe arming verifies the alarm will arm passively
- Patented Phase-5 Protection assures continual protection
- Dual Power Protection (D.P.P.) against cutting of alarm's power

(2) 5-Function LED

- LED indicates alarm arming (in passive mode), armed, and disarmed, door open, plus valet mode
- Indicates RF transmitter reception and trigger memory for troubleshooting

(3) Multi-Function Push-Button

- Valet (panic can still be activated)
- Emergency Disarm (sets alarm to passive arming and gives 10-sec. entry delay)
- One-time override of passive arming

(4) Starter Disable Output

- Disables starter once alarm is armed
- Starter sensing triggers alarm if thieves attempt to start car

(5) Door Lock Outputs (Pos./Neg. Flip-Flop)

- Handles most vehicles without need for relays
- Lock/unlock doors via remote, even while driving or in valet
- Ignition-controlled door lock/unlock. (programmable)
- Selectable door-lock timing (0.5 or 3.5 second)

(6) Dual-Stage Shock Sensor (Patented)

- Separate pre-intrusion & trigger adjustments
- Shock Sensor Bypass from remote
- Miniature size. Installs anywhere

(7) 128dB Multi-Tone Siren

- Super-small, 3-tone, 128dB. No "toy" sounds
- Chirps indicate armed, disarmed, pre-intrusion, & zone bypass
- Patented Stay-Safe Disarm shuts off sounding siren without disarming the alarm

(8) Flashing Parking Lights (Built-in relay)

- Flash for armed, disarmed (special car locator function), pre-intrusion alert, zone bypass, & tamper
- Flash continuously if alarm triggered
- Flash when transmitter is used & alarm is in valet
- Pos./neg. output, single
- or dual-circuit

(9) Two 4-Button, 2-Channel Transmitters

- Easy code-learning of transmitter, with Code Wash to delete lost or stolen codes

- Arm/disarm from up to 200ft (60m)
- 68 billion possible codes
- Use for 2nd channel (trunk release) and panic
- Quiet Mode overrides chirp through remote
- Zone bypass through remote
- Shock sensor bypass through remote

(10) Instant Triggering

- 6 inputs trigger alarm when trouble occurs.

(11) Multiple Programming Functions

- Active or Passive Arming
- Current/Switch Sensing
- Chirp/No Chirp
- Starter disable N.O./N.C.
- Ignition-controlled doorlock
- Secure lock
- Door lock timing
- Double pulse unlock
