

SECO-LARM E-931-S50RRLQ Large Reflective Photoelectric Beam Sensor/50ft

Large Reflective Photoelectric Beam Sensor/50ft

Features

- Up to 50ft (15m) sensing range
- Large sensor with patented design and large reflector for a large sensing area and easier alignment
- Reflective beam provides reliable perimeter security, minimizing false alarms from falling leaves, birds, etc.
- Lensed optics reinforces beam strength and provides excellent immunity to false alarms due to rain, snow, mist, etc.
- Response time adjustable from 50–700 ms for nearly all situations
- NO/NC Alarm output
- 12–250 VAC/VDC operation
- Weatherproof, sunlight-filtering case for indoor and outdoor use
- Includes large reflector, hoods for sensor and reflector, and mounting hardware

Typical Applications

- For garage or overhead doors, outdoor gates
- Industrial automation: detect objects on manufacturing line
