

SECO-LARM EB-P316-60MQ 16 Channel Video/Power/Data Passive Midpoint Combiner

ENFORCER VPD (Video/Power/Data) Combiners work in conjunction with standard passive VPD baluns and RJ45 cables to simplify and organize a large scale CCTV installation. Using this allows for increased flexibility and simplified, more organized cable installation, providing power to cameras while delivering high quality video all over a single CAT5e/6 cable. Troubleshooting is therefore greatly simplified and clutter reduced. ENFORCER VPD combiners are compatible with all HD analog, including HD-AHD, HD-CVI, and HD-TVI, as well as traditional analog formats.

Features

- Video, power, and data over a single category cable - CAT5e-6
- Compatible with all traditional and HD analog formats, including HD-AHD, HD-CVI, and HD-TVI
- Used in mid-span applications
- Supports up to 16 cameras
- Power LED indicator for each channel
- Can transfer HD analog video up to 1,476ft (450m)*
- Use any external low-voltage power supply
- Rack-mountable using included brackets

*720p HD-CVI video; other formats will have different maximum ranges
