

Patton TKIT-MADI-S TD-6010 (Pair) MADI (AES10) to SM Optical Conversion/1310nm/20km

TD-6010 (Pair) MADI (AES10) to Singlemode Optical Conversion, 1310nm, 20km, Includes AC Power Adapters

Even though we deal with rocket scientists, this is NOT rocket science. So we are making it as simple as possible. One SKU gets you everything you need to improve your system from copper to fiber. Just pick your system...

The FiberPlex Technologies 'TKIT' bundles takes the incredible flexibility of our TD-6010 12.5 Gbps workbox and bundles it with a set of application specific SFP modules to create a simple, easy to order solution for your specific application.

Features:

- Meet Electrical Specifications of AES10-2003
- Available as Transceiver, Dual RX or Dual TX
- HD-BNC™ connectors (75Ω)

Integrated Equalizer:

- Typical length of Belden 1694A cable: 100m at 125Mb/s

Integrated Cable Driver

- Control via serial interface including:
- Input signal detection
- Voltage & Temperature Monitoring
- Module Information
