

PreSonus EM-Mount Mounting Kit for PreSonus EarMix 16M

The PreSonus EM-Mount Mounting Kit is designed specifically for the PreSonus EarMix 16M AVB personal monitor mixer and allows for the unit to be mounted to a music stand or microphone stand. The mount can be deployed with two options: it can attach to the standard screw mount at the top of a microphone stand or it can be clamped horizontally to a pole. The base of the EM-Mount attaches to the EarMix 16M via two included thumb screws. The kit also includes the EarMix 16M mounting bracket, a microphone top mount base, a stand pole mount base, and a microphone stand adapter.
