Osprey 95-00497 480e 8x Composite Analog PCI Express Capture Card

The Analog PCIe Series of Capture Cards offer a wide range of input selections.

Ideal for mission critical video capture, deploy two or more cards in a single workstation or server chassis for maximum input density. Driver based pre-processing features include closed-caption extraction and rendering, logo and bitmap overlay, scaling, cropping, deinterlacing and inverse telecine.

The quality, reliability and flexibility makes this series perfect for applications in Broadcast, Education, Enterprise, Government, Medical, Military, sports and House of Worship.
