

Atlona AT-HDAiR USB TO VGA/HDMI WIRELESS EXTENDER

Atlona PC to Computer Monitor/HDTV Wireless adapter (Now With Audio!!!). Model: AT-HDAiR

The Atlona's all new AT-HDAiR is designed to connect any Windows Based computer to either your HDTV or Computer Monitor wirelessly though VGA or HDMI Connections. The HDAiR is based on a powerful UWB technology, allowing users to extend high resolution content up to 30ft away. Atlona adapter is capable of supporting resolutions up to 1440x1050 or 720p. The AT-HDAiR is features with dual video (HDMI and VGA) and dual Audio (HDMI-Audio and 1/8" mini stereo) outputs. Both outputs are active simultaneously.

Whether wirelessly connected to a projector in a meeting room or to a flat TV screen in the living room, the the Atlona HDAiR allows users to easily and conveniently extend their PC visual workspace. Providing both HDMI interface, common in flat TVs, and VGA interface, common in projectors and computer monitors—the HDAiR provides users with the flexibility. **Both HDMI and VGA output connections are active at the same time**, therefore HDAiR receiver could be used to power up 2 displays at the same time with identical content.
